THE PERRIN & ROWE STORY

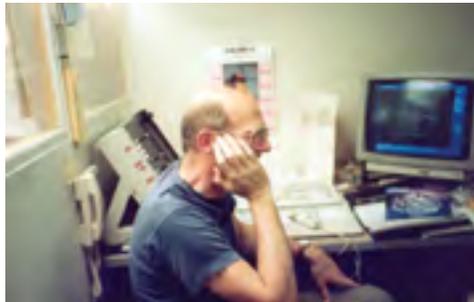

Established in 1978 by Bob Perrin and Greg Rowe, the company started life in a large barn in Bob's back garden in East London, engineering and manufacturing components for other brassware companies.

Early on in the 1980s, Perrin & Rowe obtained a reputation as excellent problem solvers and accomplished engineers and we expanded and acquired our first factory in Rainham, Essex. Now the development of our own products, not just components for other companies, began.

The world's first tap containing Triflow Technology was invented and patented in 1991 – a three-way tap that dispensed hot, cold and filtered water. Quickly becoming an established market leader, within a few years it was selling around the globe.

WHERE IT ALL BEGAN - BOB PERRIN'S FIRST WORKSHOP IN EAST LONDON

BOB PERRIN WAS A MASTER DRAFTSMAN USING THE LATEST AUTOCAD COMPUTER SYSTEMS

SCREWCUTTING WASHER PLATES FOR A CUSTOMER

MOLTEN BRASS IN THE FURNACE

A WORLD FIRST - BRANDED 'ATRIFLO'. THIS WAS THE GROUNDBREAKING CONCEPT THAT HIT THE MARKET IN 1991

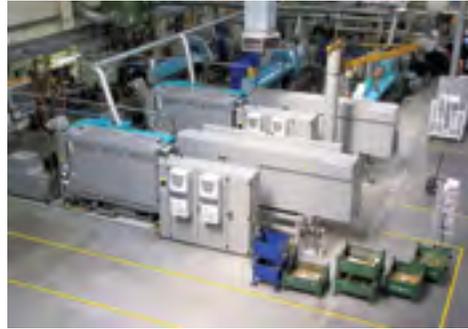

**PERRIN & ROWE PRODUCTS
ARE FULLY DESIGNED AND
MANUFACTURED IN THE UK**

Having established a reputation for excellence and quality, Bob Perrin and Greg Rowe were now keen to expand their own brand and in 1993, the first Perrin & Rowe kitchen products started to roll out of our factory.

A natural progression of the success achieved within the kitchen industry led us to develop and produce the first range of bathroom brassware in 1995. It was clear that the UK market had been waiting for products such as ours, with timeless, beautifully proportioned designs, considered function and lifelong quality. It also became obvious that other markets desired these qualities and an exclusive distribution deal with Rohl in the US quickly brought Perrin & Rowe fittings to an overseas market craving English tradition and excellence. Australia and New Zealand followed and all these relationships are still going strong today.

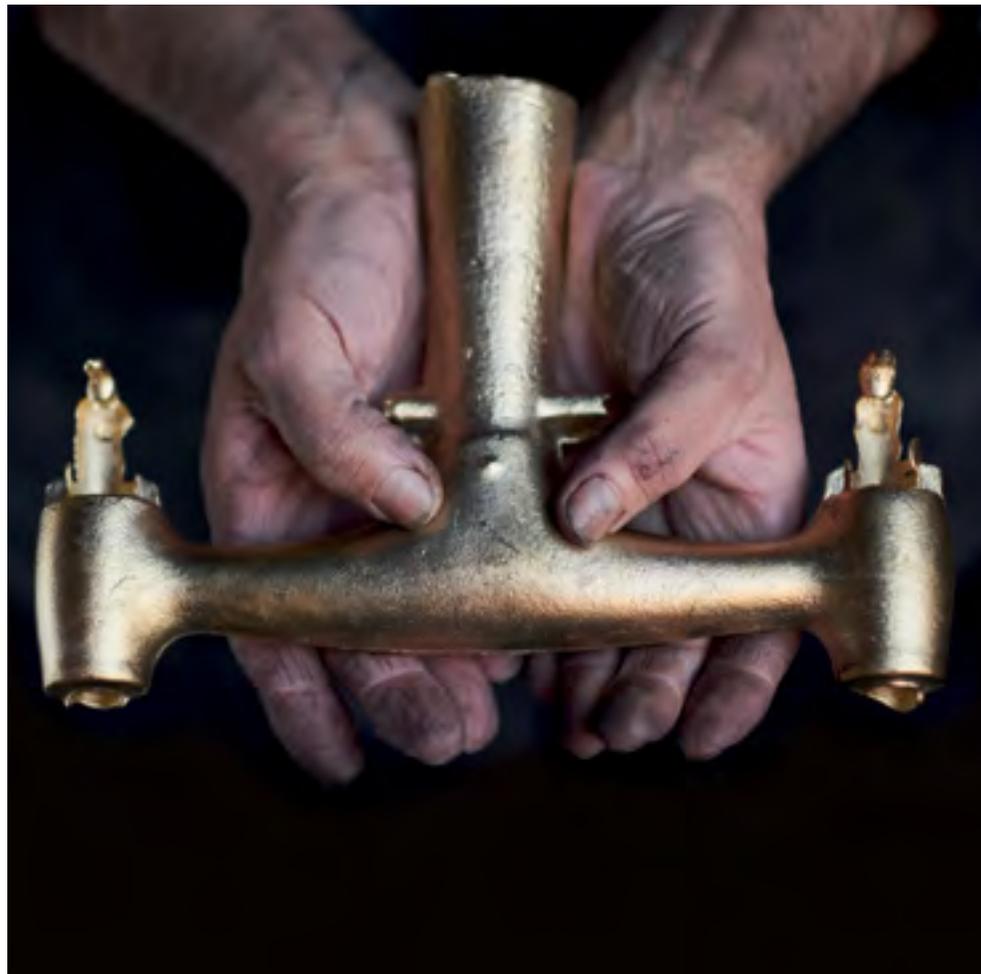

THE 55,000 SQFT RAINHAM FACILITY

ADVANCED CNC MACHINERY - JUST ONE PART OF THE MASSIVE 127,000 SQFT CURRENTLY IN OPERATION BY PERRIN & ROWE

THE DESIGN PROCESS - PRODUCTS ARE PROTOTYPED BEFORE PRODUCTION BEGINS

By the millennium, it was evident that Perrin & Rowe had outgrown their current factory and we moved to a huge 55,000 sqft facility in 2003, enabling us continued growth for years to come. In a few short years, the Company also acquired premises in the midlands to secure the casting, polishing and plating processes, and also a production facility to allow the launch of our own sanitaryware range.

Today, Perrin & Rowe is one of the largest manufacturers of authentic kitchen and bathroom products in Great Britain, employing over 140 people. We have redefined the market needs for classically British decorative brassware and managed to keep skilled manufacturing jobs here in the UK.

With factories in Tamworth, Rainham and Wolverhampton, all Perrin & Rowe products are manufactured from raw materials by our skilled team of engineers. With an ongoing commitment to preserving skillsets, we offer a number of apprenticeship schemes with an emphasis on teaching participants the engineering skills required to manufacture the high quality products offered by Perrin & Rowe.

Environmentally aware - In the last few years we have made significant reductions in our power and water consumption, as well as recycling brass waste, machine oils and packaging.

A FRESH CASTING IN THE HANDS OF A TRUE CRAFTSMAN

THE FUSION OF FUNCTION AND BEAUTY; DURABILITY AND DESIRABILITY

The strength of the Perrin & Rowe brand is built upon a clear understanding of the requirements in the luxury sector: product reliability, durability, quality and real value for money. Renowned for our unrivalled quality and an exacting attention to detail, our wide and varied product portfolio includes kitchen taps, bath and basin brassware, bathroom accessories and bathroom chinaware, all designed and manufactured in our own UK factories.

Perrin & Rowe products are outstanding examples of design excellence combined with cutting edge precision engineering. Our products are not mass produced; instead we concentrate on perfecting each individual product by controlling each process to our own exacting standards.

Our reward – Perrin & Rowe products have consistently been specified and installed in the most stunning and luxurious hotels, resorts, spas and private residences around the world.

PERRIN & ROWE BATHROOM PRODUCTS WERE SPECIFIED FOR THE SOFITEL HOTEL, ST JAMES, LONDON.

FUNCTIONAL PROTOTYPES ARE CRAFTED BY HAND IN THE TOOL ROOM

PRODUCTS ARE HAND ASSEMBLED AND EACH ONE IS INDIVIDUALLY TESTED TO EXCEED INDUSTRY STANDARDS

THE PERRIN & ROWE PROMISE

All products are manufactured in the UK from the highest quality raw materials available.

Inspired by innovation and driven by engineering excellence.

Manufactured employing the latest available technology.

Plated to a thickness that exceeds the industry standards. This additional plating will ensure a deep, protective coating that is resistant to wear and tear as well as pleasing to the eye.

Assembled by hand and individually water tested to ensure peace of mind.

Made to include bearing rings and engineering 'O' seals on handles and spouts to ensure maximum durability. This feature prolongs the service life of the product and gives Perrin & Rowe products a stable 'wobble-free feel'.

Containing ceramic disc valves supplied by a leading ceramic valve manufacturer, the valves are repeatedly tested up to 500,000 life cycles, (turned on and off with pressurised water), designed to simulate up to 25 years domestic use.

Specifically manufactured for each market. No additional adapters or converters are required for installation.

BEST IN THE BUSINESS

- Innovative 3-in-1 instant hot mixer, perfect for hot drinks, cooking, food prep and cleaning
- A wide range of standalone dispensers to match all of Perrin & Rowe's current sink mixer styles
- Available in all the Perrin & Rowe standard and special finishes
- Compact, high quality heater tank with state-of-the-art digital touch screen display
- Quick and simple installation using a standard 13amp socket
- 1.5KW element
- 2.4 Litre capacity tank
- Vented system
- High quality filtration system
- Backed by the Perrin & Rowe promise and competitive guarantees.

THE PHOENIX 3-IN-1 INSTANT HOT TAP WAS SPECIFIED FOR ALL 190 APARTMENTS AT THE ICONIC CANALETTO TOWER, LONDON.

LATEST FILTRATION TECHNOLOGY

THE CARTRIDGE WITH NANO FILTRATION ENABLES THE REMOVAL OF 'NASTIES' INCLUDING WATER BORNE BACTERIA AND CYSTS

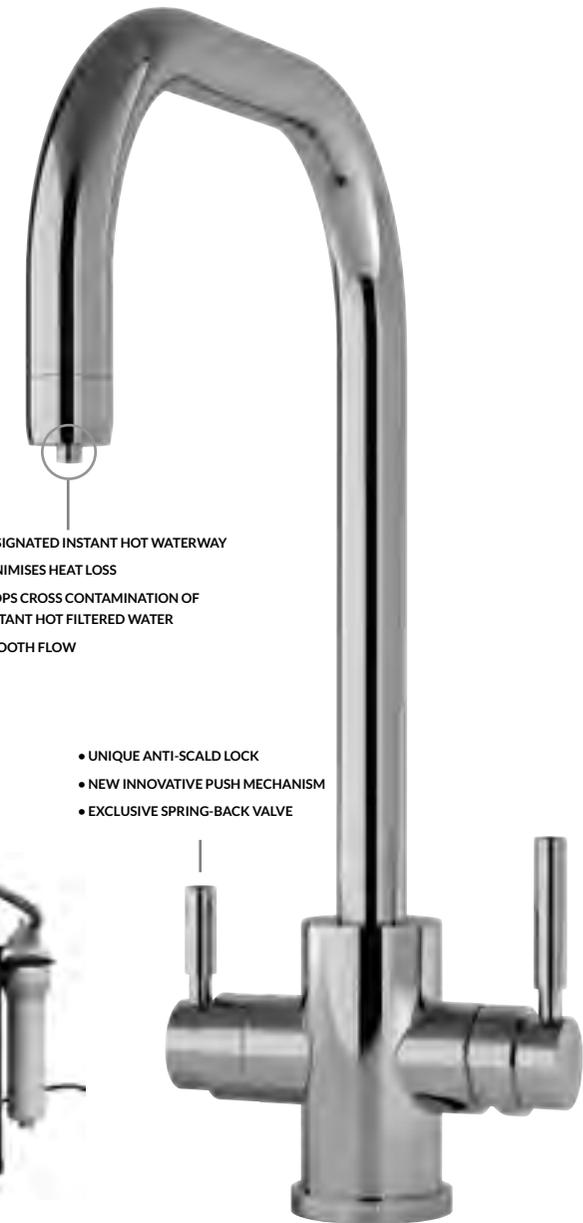

- Compact design
- Non-pressurised filter housing
- Easy to install with moveable fixing bracket
- New design filter housing connection for quick and easy filter replacement
- High quality cartridge with nano filtration technology removes debris, water borne cysts, bacteria, chlorine, chemicals, bad taste and odour
- Lime scale reduction to increase product lifespan
- 6 month filter life
- Complimentary reminder service for replacement cartridges

UNIQUE FEATURES

- Unique anti-scald locking mechanism on all instant hot models
- Operates from as low as 1.5 bar
- Multiple pre-set temperatures ranging from 75°C to 98°C
- State-of-the-art digital touch screen display
- Digital temperature control accurate to 0.5°C
- Rapid reheat with zero run off and spit free
- Water saving, time saving and energy efficient
- Hi-flow
- Easy to install and use
- UK manufacturer
- Available in a range of styles and finishes

DIGITAL TOUCH SCREEN DISPLAY USES LATEST LED TECHNOLOGY, ENABLING THE USER TO SEE INSTANTLY THE STATUS OF THE UNIT

- DESIGNATED INSTANT HOT WATERWAY
- MINIMISES HEAT LOSS
- STOPS CROSS CONTAMINATION OF INSTANT HOT FILTERED WATER
- SMOOTH FLOW

- UNIQUE ANTI-SCALD LOCK
- NEW INNOVATIVE PUSH MECHANISM
- EXCLUSIVE SPRING-BACK VALVE

HOT WATER TANK AND CARTRIDGE IS COMPACT, FITTING NEATLY UNDERNEATH THE SINK IS ACCESSIBLE FOR EASY SERVICING

3-IN-1

Near-boiling water, plus standard hot and cold straight from a single mixer. The 3-in-1 models include anti-scald lock technology and a dedicated hot waterway to stop cross contamination.

ALL SYSTEMS FLOW

The technology behind the Perrin & Rowe filtration collection derives from the world's first three-way tap, delivering not only hot and cold water but also filtered water through a dedicated waterway – a system that ensures the filtered water is not cross-contaminated by the standard mains hot and cold water. It incorporates the highest standard Swiss-made ceramic filter which significantly reduces harmful substances such as chemical and biological contaminants as well as the most heavy metals and particles as small as 0.2 microns, while leaving beneficial minerals such as fluoride, magnesium and calcium untouched.

FOUR STAGE FILTRATION

COMPOSITION

The Ceramic filter incorporated in the Filtration system is one of the highest performing filters available in the market today and is made by Swiss manufacturer Katadyn. The cartridge is made from sintered diatomaceous earth and has a micro porous structure impregnated with silver which is known for its antibacterial action. The porous structure is able to eliminate particles down to 0.2 micron (0.0002mm) in size. One pound of carbon contains a surface area of roughly 125 acres and can absorb literally thousands of different chemicals. Activated carbon is carbon which has a slight electro-positive charge added to it, making it even more effective in eliminating chemicals and impurities. As the water passes over the positively charged carbon surface, the negative ions of the contaminants are drawn to the surface of the carbon granules.

UNIQUE FOUR STAGE
FILTRATION TECHNOLOGY IS
RIGOROUSLY TESTED
AND DEVELOPED

Diatomaceous Ceramic: Suspended matter and bacteria are retained on the ceramic surface without the use of chemicals.

Anti-Bacterial Silver: The ceramic permanently incorporates Katadyn silver that works against bacteria growth in the filter.

Carbon Block Core: Absorbs chlorine, harmful chemicals and organic contaminants that contribute to bad taste and odour.

Zeolite: Has the capability to remove heavy metals such as lead and mercury.

The filter does NOT eliminate important minerals such as magnesium, calcium and fluoride

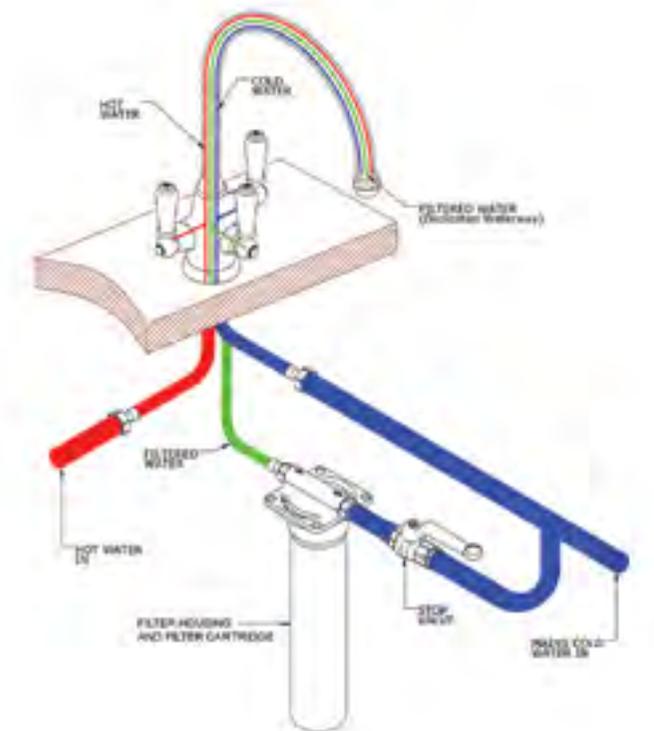

THE FILTER CARTRIDGE
SIGNIFICANTLY REDUCES
THE FOLLOWING
SUBSTANCES:

- Odour and bad taste
- Chlorine
- Organic components such as animal and human waste
- Bacteria such as E.Coli
- Protozoan cysts such as Giardia and Cryptosporidium
- Pesticides and herbicides
- Solvents
- Benzene
- Radon
- Turbidity
- Heavy metals such as Lead

The filter has been tested by
Harvard University,
USA Waukesha County Health,
USA University of Basel,
Switzerland Zurich University,
Switzerland Ministry of Welfare,
Argentina Pasteur Institute Lille, France
South African Bureau of Standards
Pretoria, South Africa.

AQUITAINE

WITH PULL-DOWN RINSE

Offering an alternative to the traditional side spray rinse and freeing up precious worktop space, this monobloc sink mixer comes with a built-in retractable metal hand spray at the end of a high quality woven hose.

COMBINATIONS AVAILABLE

Aquitaine 4744 Monobloc sink mixer with pull-down rinse

A gentle pull releases the hand spray for use, with change of flow available at the touch of a button. After use, the hose automatically retracts into the tap body, ready to function as a normal hot and cold mixer tap.

HAND RINSE

Clean fresh fruit, vegetables and dirty crockery sinkside and without wasting water with the addition of a stand-alone hand rinse.

Traditional hand rinse is easy to use and convenient - makes food preparation a breeze.

Available for most Perrin & Rowe kitchen taps, the hand rinse makes a tap a multi-purpose workstation. Easy to use and versatile, the rinses can be positioned to the left or the right of the sink. They have insulated handles and a flexible hose (standard length 120cm) ensuring safety and convenience. Hot, cold or mixed water is diverted to the rinse once the button is pressed. Perrin & Rowe hand rinses have been specially designed to cope with even low water pressures; the integration of a patented diverter means that they can be effective with just 1 bar (15psi) of pressure. Perrin & Rowe hand rinses are available in five different designs to complement each collection.

Please note: Rinses must not be connected directly to the mains supply of cold water and that the maximum recommended pressure is 5 bar (75psi). Taps selected with rinses will have single-flow aerated spouts.

All hand rinses are deck mounted.

SPOUTS

The Traditional range of kitchen sink mixers offer interchangeable spouts, enabling you to create a look and flow that suits you.

TRADITIONAL SPOUT OPTIONS

All mixers in this range (excluding Mayan) are available with either a Phoenician or Etruscan spout.

SINGLE FLOW SPOUTS

Single flow spouts are ideally installed in systems with equal pressures. Spouts are fitted with an aerator, providing the uniform 'Champagne style' flow as standard. Minimum recommended installation pressure = 1bar.

A flow straightener is also available on request.

BI-FLOW SPOUTS

Products with bi-flow spouts are ideally suited to installations with differing hot and cold supply pressures, especially where the hot supply is gravity fed.

If your installation has equal pressures then you may prefer a single flow spout, all of our bi-flow products are available as a single flow, just prefix the product code with the letter A.

Minimum recommended installation pressure = 0.2bar.

REGULATED SPOUTS

If you have high pressures or are concerned about water consumption then you may wish to regulate the flow. All of our products are available with regulated single flow spouts – just prefix the product code with AR. Minimum recommended installation pressure = 2bar.

STANDARD

Perrin & Rowe brassware can be customised to suit your own personal style with eight, high quality finishes that complement a range of kitchen designs, appliances, cabinetry and fittings.

OUR STANDARD BRASSWARE FINISHES INCLUDE:

Chrome

A brilliant, silver finish with a hint of blue.

Nickel

A shiny finish with a golden glow.

Pewter

A brushed Nickel finish with a blue-grey, matte appearance.

Phoenix 1914 in chrome

Aquitaine 1470 in polished brass

SPECIAL

Perrin & Rowe special finishes are a range of luxurious, warm metallic hues to bring a touch of style and unique character to your kitchen.

A guide to caring for each of the different finishes is available on our website.

The three brass finishes are described as 'living finishes' which means they develop a unique patina as they react with their environment.

Polished brass

A warm finish with coppery undertones.
Living finish.

Satin brass

A matte finish with strong undertones of yellow ochre.
Living finish.

Gold

Plated with 24 carat gold pure yellow in colour, with a natural glow and high shine.

Aged brass

A darker finish with a tarnished, aged look.
Living finish.

English bronze

A metallic brown finish with subtle notes of orange and copper.

THE WORLD'S FINEST FIRECLAY SINKS, HANDMADE IN THE UK

Each Perrin & Rowe fireclay sink is lovingly created by Shaws of Darwen using time-honoured traditional methods and materials, bearing testament to the craftsmen who produce them.

Perrin & Rowe sinks demonstrate the natural characteristics of fireclay ceramics and are created by a 'slipcasting' process. A mixture of clay and water is poured by hand into a porous mould. When the newly formed sinks are dry enough, craftsmen remove them from their moulds before hand finishing the sinks through a process of sponging and fettling to create a smooth finish. Following a gradual drying period of up to 40 hours, the sinks are then prepared with a ground coat before being glazed. Firing in specially designed kilns at temperatures of up to 1200 degrees centigrade completes this rigorous process.

Whilst modern technology has improved manufacturing methods over the years, the principles of this handcrafted product remain the same. Traditional craftsmanship is as important now as it's always been.
