# Selecting a Sink

1 MATERIAL 2 TYPE 3 SIZE 4 STYLE 5 FEATURES

## Material

**STAINLESS STEEL:** Stainless Steel is a timeless material which remains a popular choice. It is often a perfect match to the kitchen appliances so provides a coordinated finishing touch. As well as the aesthetics, it is easy to maintain and is extremely durable. All Abode sinks are constructed from premium 304 grade stainless steel and are available in an array of designs.

HYGIENIC

EASY TO CLEAN

HIGH HEAT RESISTANCE

STAIN RESISTANT

CORROSION RESISTANT

PREMIUM GRADE STAINLESS STEEL

**GRANITE:** SiOForm® is a unique material solution engineered specially for our granite kitchen sink collection. The material is primarily made of pure and natural quartz which makes it very strong and durable, perfect for the kitchen environment. SiOForm® products have a uniform void-free structure and are resistant to dry temperatures up to 280°. Granite sinks also retain the water temperature in the bowl better than stainless steel. Our range consists of several unique designs in various shapes and sizes. In addition, the white, grey and black colour options offer a contemporary styled solution to create a striking focal point in the kitchen.

HYGIENIC

EASY TO CLEAN

UNIFORM STRUCTURE

HIGH CONTENT OF NATURAL MINERAL

STAIN RESISTANT

SCRATCH RESISTANT

IMPACT RESISTANT

THERMAL SHOCK RESISTANT

SURFACE ABRASION RESISTANT

SiOForm® is available in the following colours:

WHITE GRANITE

FROST WHITE

GREY METALLIC

BLACK METALLIC

BLACK GRANITE

**CERAMIC:** Our ceramic sinks are constructed from the finest grade fireclay and are hand finished for a premium quality finish. This traditional classic is available in undermount, apron front and inset options, providing an elegant finish every time. The glazing process ensures a long lasting and durable finish.

HYGIENIC

EASY TO CLEAN

HIGH HEAT RESISTANCE

STAIN RESISTANT

CHEMICAL RESISTANT

DURABLE AND LONG LASTING

# Sink types

**UNDERMOUNT:** An undermount sink is installed under the worktop for a seamless, premium finish. Undermount sinks look best when installed in solid surface, granite or solid wood worktops. There are a large range of bowl sizes and configurations to choose from in this offer, providing ultimate versatility when it comes to usage requirements. The tap is often mounted on the worktop, adding to the premium, sleek look.

**APRON FRONT:** This range consists of our Belfast and Provincial products. They are installed under the worktop with the front face visible so require a base cabinet with a specific height to house them. Traditionally these products are ceramic, for a more contemporary/industrial style, opt for the stainless steel Belfast.

**INSET:** An inset sink sits on top of the worktop and can be installed in any material, including laminate. An inset sink will often have a drainer integrated for ease and durable functionality. The tap is usually mounted on the sink and often these designs have two tap holes so they are reversible, meaning the drainer can be positioned either left or right.

# Sink sizes

Across our comprehensive sink collection, we have several sink sizes available. In the initial planning stages, it is important to consider how the kitchen is to be used to determine which option is best suited to your lifestyle requirements.

Think about how the kitchen is used and what elements of a sink would make tasks easier, for example; what typically needs to fit in the main bowl? Is a larger main bowl size needed? Would the addition of a half bowl be beneficial? Is a drainer required?

## EXAMPLES ARE AS FOLLOWS;

Single Half Bowl

Single Bowl

1.5 Bowl

Double Bowl

Large & Extra Large Bowl options

## Style

The overall style of the kitchen will go a way to dictate the perfect sink and tap pairing. Bring colour into the kitchen with a granite sink and either a perfectly matched or contrasting tap pairing.

For example; an industrial style kitchen with dark colourways looks great with a stainless steel or granite sink plus a perfectly matched tap in stainless steel, black, or graphite. However, consider the finer details such as the handles or any key detailing on appliances/ accessories in the kitchen when selecting the perfect tap finish, it may be that a brass or copper tone is more suited to complement the kitchen overall.

## Sink features

LOOK OUT FOR THE FOLLOWING FEATURES ON SELECTED SINK RANGES

### FLUSH PLATE OVERFLOW

This removable overflow cover has the following benefits;

Removable for improved sink hygiene (easy clean)

Provides a sleek, premium finish

Constructed from solid stainless steel

### ORBIT WASTE

Provides a minimalist look, whilst removing unsightly debris from view

Constructed from stainless steel and rubberised plastic

Dishwasher safe, as well as being easy to empty

### TOP MOUNTED OVERFLOW

Allows for maximum bowl filling

Dispose of drinks even when the bowl is full

Applies to Londa and Neron ranges only

Look out for the following symbols throughout this section:

REVERSIBLE  
Overflow or drainer can be positioned either left or right.

2ND TAP HOLE  
FOR SWITCH

# STAINLESS STEEL UNDERMOUNTS

## Understated simplicity

It's not just the material that's versatile but the range of products in this offer.

We're confident you'll find the perfect solution from our stainless steel undermount collection. Whether you're looking for a small single bowl, one and a half bowl, large bowl or even an extra large bowl!

We also have ranges which allow you to create the undermount look without the expense of solid surface. Take a look at our R15 range which can be either undermounted or inset so worktop material doesn't restrict you from creating the look you desire.

## MATRIX R15

The R15 range is the most versatile undermount stainless steel sink in our offer. Not only can the products in this collection be installed either undermounted or inset, but there are six different bowl sizes available. The way we each use our kitchen differs, perhaps you are a keen cook or entertain often? If so, you would benefit from an extra-large bowl in which you can fit large pans, trays or barbecue racks that won't fit in the dishwasher.

1mm durable 304 grade brushed stainless steel construction

Orbit wastes with easy empty, fold-back basket and pipework included

Minimal 15mm radius corners. Stylish yet still easy to clean

Deep bowls and good breadth of range

With easy clean flush-plate overflow

# STUDIO COMPACT

The Studio was designed for compact kitchens and grander installations alike. In smaller kitchens maximise worktop space thanks to Studio's compact yet functional proportions, or install as a practical preparation sink, ideally suited for stand-alone steaming hot water taps. Three accessories are supplied with the Studio sink, adding useful functionality where space is limited.

Two installation options available:

- 600mm cabinet requirement in horizontal mounting position (450mm in vertical)
- Low profile inset or undermount installation
- 1mm 304 grade brushed stainless steel
- Small radius bowl corners for contemporary style with effortless cleaning
- Orbit waste with easy empty, fold-back basket and pipework included
- Flush-plate overflow for a sleek contemporary look

Single bowl

**AW5134**  
Stainless Steel  
£515

length 500mm  
width 300mm  
depth 205mm  
bowl l capacity 16.9L  
min base unit 450mm (vertical mounting)  
600mm (horizontal mounting)

Comes complete with  
3 practical accessories; strainer,  
colander and mini bowl in the pack

Full specification documents can be found at [www.abode.eu](http://www.abode.eu)

## CERAMIC UNDERMOUNTS

Ceramic sinks are often perceived purely as a traditional option for a traditional setting, however this range of products is extremely adaptable. Try pairing with a contemporary tap in the finish of the moment for a striking effect.

Image shows the Belfast Sink and Atik Monobloc in Matt Black

## BELFAST

A true classic! The Belfast sink is a staple when it comes to a traditional kitchen, not only does it sit beautifully in any kitchen setting, but it has a large bowl capacity making it perfect for the busy household or keen cook. Try mixing this classic sink with a contemporary tap to inject a modern twist, suitably paired with the other finer details of your kitchen design.

Large bowl  
[reversible]

Durable finest grade fireclay construction throughout

High capacity bowl volume to accept larger cookware

60mm basket strainer waste supplied

Smooth, contoured integral weir overflow built-in

## GRANITE INSETS

Our range of inset granite sinks are truly distinctive. There are models with curvaceous contours and drainers with real design flair. These sinks don't only have big personality, they have true functionality. With 5 colours available across the range and all models constructed from our SiOForm® material, these sinks are as durable as they are striking.

Image shows the Dune 1.5 Bowl in Grey Metallic and Centaur Single Lever

ASPEKT

The curvaceous contours of the Aspekt make this sink a truly showstopping piece in any kitchen. The way the drainer flows down into the main bowl is a thing of elegance, all contrasted with square edges for a sharp and striking finish.

The black option features a discreet metallic fleck to add sparkle to your kitchen. The white offers a pure, natural finish that will provide the perfect finishing touch in most interiors

Orbit wastes with easy empty fold-back basket and pipework supplied

Full specification documents can be found at [www.abode.eu](http://www.abode.eu)

# DUNE

The Dune collection takes its name from the drainer design, mimicking the soft peaks formed across sand dunes.

Dune takes a truly natural and organic form with its rounded corners which follow through into the bowl styling. Everything combined results in a stunning yet practical range.

Hidden Orbit overflow design

Orbit wastes with easy empty fold-back basket and pipework supplied

# Sink accessories

A RANGE OF PRACTICAL & STYLISH ACCESSORIES ARE AVAILABLE FOR SINKS ACROSS THE ABODE RANGE.

## GLASS CHOPPING BOARDS

Add coordinated functionality to your kitchen with a premium Abode glass chopping board.

With black glass options tailored to fit the Apex and Mikro stainless steel inset sinks and both black and white options tailored to fit the Aspekt and Zero inset granite ranges.

## DRAINER RACKS

Robust functionality that delivers on style.

This Black & Blum product features contemporary styling. The wave of vertical prongs can hold delicate glasses, heavy pans and even baby bottles. Features a drainage tray which can either release or retain water. Can be folded down to a flat compact shape for easy storage.

## COLANDERS

Make your sink even more functional by adding a stainless steel colander. These half bowl colanders are the perfect complement to several sink families, making tasks such as emptying large pans a breeze.

## BOWL MATS

Rubber bowl mat to prevent impact in the sink bowl.

Temperature resistant up to 200 degrees.

Design includes hard wearing surface texture and an anti-float feature.

## DRAINER MATS

These versatile silicone rubber drainer mats are great for providing a versatile draining option in any environment, or for protecting stainless steel drainers. They are suitable for use with hot pans up to 230 degrees and are dishwasher friendly.

For further details on sink accessory pairings see page 104.

# Style and finishes

A completely unique range of designs shaped by our UK design team. From contemporary single levers and functional steaming hot water taps to traditional monoblocs in a variety of finishes, we have an extensive range to ensure we have the perfect high quality design for every kitchen.

**Design, quality and innovation are at the heart of what we do.**

Finding a tap that not only matches, but perfectly complements your kitchen and all of the accessories within it can be challenging. That's why we are constantly updating our portfolio, as well as adding new finishes to the mix to ensure the perfect finishing touch every time.

# Tap performance

To ensure you achieve the best possible performance from your chosen tap, you need to be able to identify the existing plumbing system in place and therefore estimate the water pressure.

The following information provides a general overview on water pressure, however we do recommend that a plumber checks your water pressure with a pressure gauge.

## Lower Pressure (gravity fed / vented system)

You have a cold water tank in the loft space and a hot water tank in the airing cupboard

You don't have an additional pump which is activated when you turn on any hot tap

The amount of hot water available to you is limited

With a gravity fed system you can approximate your hot water pressure by dividing the vertical distance (A) in metres by 10 (e.g. 3m = 0.3 Bar)

You should choose taps which are suitable for use with a lower pressure system

## High Pressure (combi boiler)

You have a boiler but no separate hot water storage cylinder

The boiler is typically found in the kitchen

Hot water is delivered instantly and on demand

This system typically delivers the hot water between 1 and 1.5 bar

You should be free to choose from most of our tap range

## High Pressure (pumped gravity fed system)

You have a cold water tank in the loft and a hot water cylinder in the airing cupboard

You have an additional pump (normally located near the hot water cylinder) which is automatically activated when you turn on any hot tap

The pressure is defined by the pump. See pump manufacturer's details.

You should be free to choose from most of our tap range

The amount of hot water available is limited

## High Pressure (unventilated system)

Most commonly referred to as a "Megaflo" or similar brand

You have a hot water cylinder directly connected to the cold water supply. Above the cylinder could be an expansion vessel. (The hot water cylinder is typically in the loft space)

You do not have a cold water tank

The hot and cold water pressure is typically around 3 bar

The amount of hot water available is limited

You should be free to choose from any of our taps

## WATER AERATION

All mixers use spout aerators or flow straighteners to add bubbles to the water. These innovations in fluid technology keep your water flow in a controlled and distinctive pattern and eliminates splash back.

## VALVE CARTRIDGES

Abode use ceramic disc valves in all of our tap designs. These are tested for over 200,000 cycles before we will pass them for use within our taps. Why? Well this means that under normal use conditions your tap valves have proven that they will work for many years to come. The kitchen tap is the most used appliance in the kitchen, so valve quality assurance is essential.

## TESTING

Abode products are designed specifically for the UK by our team of in-house designers. We use artisan hand polishing techniques, sophisticated plating and powder coating processes to ensure a blemish free surface, along with robotic production of parts for precision. Every Abode product is 100% end of line tested before it leaves the factory, giving you absolute peace of mind.

## LUXURY PACKAGING

After taking all this care with the product, we want to ensure they reach you in perfect condition with all the parts that you will need for a seamless and straightforward installation. Fixing kits and tail pipes (with non return valves where necessary) are provided. If the tap is heavy or tall, we also provide you with a tap stabilisation bracket in the box. We try and think of everything so you don't have to.

Throughout this section you will see the following symbols next to products where relevant:

\* Flexible Tail Pipes are supplied with the majority of Abode taps. We therefore recommend Fast Fit Tail Pipes where supplied copper tail pipes can be upgraded. For accessories see page 271.

# PRONTEAU<sup>TM</sup> STEAMING HOT WATER TAPS

Useful technology is fast becoming the norm in the modern kitchen, with hot water taps being firmly among their number. Many of us increasingly look for additional functionality from the kitchen tap as we would from an appliance. Steaming hot water taps fulfill a need and we'll put your mind at ease about any safety concerns across the following pages, a steaming hot water tap is safer than a kettle in many ways.

# Why should I choose a **PRONTEAU**™ Steaming Hot Water Tap?

## 1/ SAVE TIME

Adding a Pronteau to the kitchen is guaranteed to make a difference and leave you thinking how you got by without a steaming hot water tap.

Some of the benefits to note are;

- Instant hot drinks
- Speed up cooking tasks such as pan filling for vegetables, pasta or rice cooking
- Instant porridge or noodles
- Speeding up cleaning tasks such as pan and dish rinsing

## 2/ DO YOUR BIT FOR THE ENVIRONMENT

By switching to filtered water from the tap in comparison to buying bottled mineral water you will save money as well as aiding the reduction of plastic waste.

Our 4 IN 1 ranges have it all, domestic hot & cold water, filtered steaming hot water and filtered cold water.

## 3/ STREAMLINE THE KITCHEN

Free up worktop and fridge space of kettles and filter jugs for clutter-free worktops and that extra fridge space that we often find ourselves needing.

## 4/ REDUCE WATER WASTAGE

As there is no need to fill the kettle every time a hot drink is made or a pan is to be filled, you will find that water and energy wastage in the household is reduced.

## 5/ IMPROVE THE TASTE OF HOT DRINKS WHILST PROTECTING YOUR BOILER

All Pronteau products are supplied with a filter. This filter has an important role as it maintains the long-term health of your boiler, preventing excessive limescale build up.

Secondly, achieve great tasting hot drinks every time as the filter will improve the taste of your water and prevent the scum that you sometimes find on hot drinks.

## 7/ GET THE PERFECT HOT DRINK

With all our hot water products, you can set the boiler to temperature's between 80 and 98 degrees allowing you to dispense water at the optimum temperature for your needs.

Check our handy table showing the perfect temperature for a range of hot drinks at [pronteau.co.uk](http://pronteau.co.uk)

## 6/ NEVER WORRY ABOUT SAFETY

Our products have been designed with safety in-mind. The ProBoil 3 uses a patented HotKey® to dispense the steaming hot water. This can be stored out of reach of children when not in use. The ProBoil.2X collection have a two-stage handle to dispense the steaming hot water, push the handle down or slide it across and turn the handle to safely dispense the water.

# Choosing the right Hot Water Tap for you

THE PRONTEAU RANGE DOESN'T LIMIT CHOICE. ACROSS THE COLLECTION WE OFFER A WIDE RANGE OF STYLES AND FINISHES TO MEET YOUR DESIGN EXPECTATIONS WITH THE ADDED BENEFIT OF STEAMING HOT WATER ON TAP.

## FUNCTIONS

### DISPENSERS

Deliver either filtered steaming hot water only or Kettle hot and filtered cold water.

#### 3 IN 1

domestic cold, domestic hot and filtered steaming hot water

#### 4 IN 1

domestic cold, domestic hot, filtered cold and filtered steaming hot water

## Why 98 degrees?

When we developed our innovative range of steaming hot water taps for launch in 2016 we took into consideration every aspect of safety, not only for the dispensing of the steaming hot water but also the maximum temperature requirements for the stored water in the boiler. This is the main reason our products store water to a maximum temperature of 98°C, this makes our product fully compliant with Part G(3) of the UK Building Regulations.

## STYLE

A variety of models, styles, popular finishes and boiler sizes allow you to tailor your experience of Pronteau hot water taps to ensure you get the right model for your household.

We are also launching new Slimline 3 IN 1 hot taps that will look perfect in every home, along with the new Propure 4 IN 1 mixers, offering hot and cold supplies along with filtered steaming hot and filtered cold drinking water.

### Professional style

Available in the 3 IN 1 range. The steaming hot water is dispensed from an outlet in the crossbar. Also features a pull around with spray function for the domestic hot and cold supply.

## PRONTEAU™ 3IN1 with PROBOIL.2X

3 IN 1 functionality delivering; domestic hot, domestic cold and steaming hot, filtered water

Dual stage water operation safety - the handles of all tap incorporate safety devices to limit use

Supplied with the new ProBoil.2X boiler with a 2.1 litre capacity

All Pronteau taps have cool touch spouts thanks to centrally insulated steaming water channel

Supplied with multistage filtration to address scale formation in the boiler, remove contaminants, and improve taste & odour of the steaming hot water to achieve the perfect hot drink

# PROBOIL.2X

## distinctly™

The ProBoil.2X is the next generation in intelligent hot water boilers by Abode, offering fast and trouble free delivery of steaming hot filtered water, instantly at the touch of a handle. Fast and simple to install, ProBoil.2X offers a 2-litre stainless steel tank, with a quick re-boil time and simple intuitive digital controls. Distinctly Smarter.

**Distinctly Hotter:** Factory calibrated to maximise boiler to cup temperatures

**Distinctly Quieter:** Insulated to reduce background heating noise

**Distinctly Simpler:** Toolless installation using hand fix colour coordinated parts

**Distinctly Faster:** In -tank over boil reservoir speeds and simplifies the installation

**Distinctly Approved:** WRAS, EMC, LVD & BEAB approved

**Distinctly Safer:** Predictable, splutter free and regulated water delivery

**Distinctly National:** National team of over 30 service engineers across the UK

HIGHER RATING ELEMENT FOR  
FASTER RE-BOIL AND HEATING  
COMPUTER CONTROLLED:

Touch display - On screen temperature display

No temperature calibration required

Filter life indicator visual and audible

Power saving mode – holiday / eco setting

Selectable temperature range

Boil dry prevention

Self diagnostics

NO EXTERNAL DRAIN VALVE:

Reduced water wastage

No need for additional drain connection

Simpler / faster / more flexible to install

All ProBoil.2X hot water boilers are protected by ProBoil Resin / GAC filters (supplied with all systems), that reduce the water hardness to help extend the life of the tank, as well as improving the taste and clarity of your drinks.

The tall body and spout paired with the distinctive design of Verla make it a real focal point in the kitchen

Soft handle styling with hot and cold indicators on the handle ends

Image shows the Zucca Monobloc in Brushed Nickel

## PULL OUT & PROFESSIONAL TAPS

**If you have the water pressure capability, a pull-out tap should not be overlooked. The cost may be slightly more up-front than a standard tap but the benefits over time will more than justify this.**

The addition of a pull-out tap to the kitchen will make daily tasks such as pan filling, dish rinsing, food preparation and sink bowl cleaning that much simpler. Ideal for the keen cook or busy family household.

The range consists of two different types of pull out tap; a true pull out and a pull around tap. On a true pull out, the hose is discreetly hidden inside the tap and allows the user to pull the hose out to its full set length. A pull around tends to be a professional style tap in which the hose is visible on the external of the tap and held in a handspray holder located on the end of the extension bar.

In this range you'll find some products with an additional spray function which is operated by pressing a button on the end of the spout. This button simply changes the flow of the water from the standard to a powerful spray.

Our range of professional taps offer the manoeuvrability and features detailed above whilst being a statement piece in the kitchen.

See our stainless steel range for pull out and professional taps constructed from solid stainless steel.

Coniq R  
Single Lever Pull Out

**AT2119**  
Chrome  
£249

Stylish and contemporary conical style utilising advanced hydroforming manufacturing techniques

Smooth, rotating swan necked spout with integrated pull down weighted spray, with integrated aeration hidden that disappears when put back into place

Four hardwearing finishes available, including the durable and striking matt black and polished copper finishes

**AT2120**  
Brushed Nickel

Striking industrial chic design with pivoting mechanical style arm

Contrasting, durable silicone hose cover

Pull-around hose with spray feature

Energy efficient cold start function

Height adjustable via the central arm and rotating spout capability

Full specification documents can be found at [www.abode.eu](http://www.abode.eu)

# STAINLESS STEEL TAPS

Stainless steel as a material has several well loved benefits including:

It is a closer match to stainless steel sinks and appliances

The material itself is 100% recyclable

Stainless steel taps have no coating, they are just polished and brushed

It is more durable and less likely to scratch, small scratches can be brushed out

Stainless steel is a naturally hygienic material

Image shows the Matrix SQ GR15 1.5 Bowl in Grey Metallic Granite and Bottilia Single Lever

## Axial Pot Filler

**AT2078**  
Stainless Steel  
£288

- Pot filler style functionality in a simple to fit deck mounted format
- Easily reach each corner of the sink or fill large pans from the worktop rather than in the bowl due to multiple swiveling spout joints
- Solid 304 stainless steel construction
- Unique, innovative and practical design
- Delivers hot, cold & mixed temperature water

The Axial can be deck or sink mounted

Full specification documents can  
be found at [www.abode.eu](http://www.abode.eu)

Bottilia Single Lever

# AQUIFIER™ WATER FILTER TAPS

The Abode Aquifier range features popular designs from our tap range as well as exclusive designs with the added benefit of a dedicated filtered water function – straight from the tap.

Image shows the Belfast and Atlas Aquifier in Matt Black

## WHAT ARE THE BENEFITS OF A WATER FILTER TAP?

**WATER QUALITY:** An Aquifier tap or Swich device filters particulates from water, reduces the taste and odour of chlorine and reduces hardness from the water.

**HEALTH:** Having filtered cold water on tap will hopefully encourage the consumption of more water. Fill a reusable water bottle each day directly from the tap.

**ENVIRONMENT:** By removing the need for bottled mineral water, every home with an Aquifier product is doing their bit for the environment by reducing single use plastic consumption.

**COST:** If bottled mineral water is a frequent purchase in your household you can save considerable amounts each year by switching to an Aquifier or Swich product.

**SPACE SAVING:** If you previously had a water filtration jug or bought bottled water, just think how much space you can free up in the fridge.

**APPLIANCE HEALTH:** If you live in an area with particularly hard water you will notice that the kettle suffers as a result of the limescale build up over time. Fill your kettle with filtered water and prolong its life.

Find out more on the website:  
<https://www.abodedesigns.co.uk/faqs/aquifier>

## HOW DOES AN AQUIFIER PRODUCT WORK?

## WHY IS IT IMPORTANT TO KEEP UP WITH REPLACEMENT FILTERS?

It is simple to maintain your filter, it sits in a bracket either at the back or on the side of the inside of the base cabinet below the sink. It is easy for anyone to replace using our simple, fast and secure 'SafeLock' system.

We offer a dedicated filter reminder service – we'll send you a reminder by email or post each time your filter is due for renewal.

Filters are easy to buy as singles or packs from [www.abode-shop.co.uk](http://www.abode-shop.co.uk) when the time comes to replace.

It's important to change the filter at the recommended intervals to ensure the consistency of the supply of fresh, filtered drinking water.

**USAGE:** The capacity of the filter units for Aquifier and Swich products vary, these range between 1000L and 6000L (dependent on incoming water quality and usage).

We have both Classic and High Resin filters available, specifically tailored for use in soft water or hard water areas respectively.

If you live in a soft water area the filter will be used up much slower than one in a hard water area (based on a standard average usage).

We recommend that our filters are changed every 6 months on average. If you live in a hard water area or have a higher filtered water consumption, replacements every 3 months may be beneficial.

Puria  
Aquifier

**AT2042**  
Chrome  
£299

Abode lead the market in innovative filter water taps and the latest addition to the range is no exception

It has a single lever cold start valve offering smooth flow and temperature control. Filtered drinking water is delivered through a separate channel delivering refreshingly fresh filtered water.

Modern engineering makes this probably the slimmest 3 IN 1 filter tap available today

Tall swan spout, with in built aeration keep filtered water and potable supplies separate

Rotate the  
filter lever  
back for  
filtered water

Full filter starter kit

# Introducing (switch)

*A revolution in filtered  
water technology*

## HOW DOES A SWITCH PRODUCT WORK?

Convert ANY kitchen tap to one which  
delivers filtered water as well as the  
standard cold water supply

The easy way to get filtered water from any  
style of tap

Simple to install either through the worktop,  
or any standard sink 35mm tap hole or even  
in the sink cabinet

Easy to use, just turn to divert to the  
filtered water function and back again to the  
standard cold water supply

Can be installed alongside a new tap or

**AT2057**

Brushed Nickel  
£240

Full filter starter kit  
supplied with  
each switch

Improve the overall taste and quality of the drinking water from any tap by adding a Swich device

Swich is easy to install and use, simply twist the device to divert the cold water to refreshing, filtered water and back to unfiltered cold water as desired

Choose from two designs and an array of finishes to perfectly complement your tap and kitchen design

To ensure the perfect solution, choose from two filter options. Choose the Classic Filter for soft water areas and the High Resin filter for hard water areas to ensure maximum longevity of the filter

HANDSPRAYS AND ACCESSORIES

## WARRANTY

### COMPREHENSIVE 5 YEAR WARRANTY

In the unlikely event that you should experience any defect in the materials or workmanship of your new

- Abode sink within 10 years of purchase
- Abode tap within 5 years of purchase
- ProBoil boiler within 2 years of purchase

The purchaser's sole remedy shall be the replacement (at the manufacturer's discretion) of all or any part of the product that is defective.

For the tap, all working parts and valves are guaranteed for a period of 5 years from date of purchase. Decorative surface finishes and O-rings are guaranteed for 1 year from the date of purchase provided that our advice concerning care has been observed and no scouring agents have been used.

This is provided that the sink, mixer or tap has been used for normal domestic purposes and that the care, installation and maintenance instructions have been observed. The warranty extends to the original purchaser only.

## CUSTOMER CARE

### CAUTION

Repeated release of boiling hot water directly into coloured sinks can in extreme cases cause crazing and even cracking. Therefore we recommend great care is taken not to release the water directly on to the sink surface at full temperature for extended periods.

### WATER REGULATIONS

All products are designed in accordance with European Water Regulations and are manufactured to WRAS or other applicable European standards. All products should be installed in accordance with Local Water Bye Laws.

Visit [www.abode.eu](http://www.abode.eu) to search all products with a current WRAS approval.

Our ProBoil boilers store water at a maximum temperature of 98°C to conform to UK legislative limits. Spout exit temperatures will vary according to environmental changes and usage patterns.

### TECHNICAL SUPPORT

Choosing the right mixer tap and sink for your home is an important choice as the tap is not only the most architectural item in your kitchen, but also the most used.

Think about the style you require, the ease of use you are looking for, and then consider your existing water supply and the water pressure available to you. If you have any questions with regards to whether a tap will be suitable for your application, please contact our technical support team or visit our website [www.abode.eu](http://www.abode.eu) for more details.

For sinks, consider the material and colour you prefer, the uses of the sink, the number and bowl sizes, the type of worktop material you propose to use and the base unit space available to install within.

Your long-term satisfaction with the product is important to us. In the event that you require spare parts for your Abode product, please contact our technical support team or visit our web site for further technical information.

### THE SMALL PRINT

Abode is a division of Norcros Group (Holdings) Limited.

Abode, Distinctly, More is Less, Aquifier and Pronteau are registered trademarks of Abode.

Errors and omissions excepted.

Our policy is to continually improve and develop our products, and accordingly we reserve the right to amend specifications, particulars of weights, measures, prices, dimensions, finish and colour availability without prior notice.
